WHA Radio 970
Madison Wisconsin

ASSISTANT TECHNICAL DIRECTOR

We do not have any QSL cards made up so we hope that this letter will serve as a reasonable substitute. We received about forty cards and letters in response to our test of Jan. 13 and came from the following States: New Jersey, New york, Pennsysvania, Maine, Connecticut, Nebraska, Manitoba canada, Guelph Ont., Indiana, Missouri, Illinois, Wisconsin, Minnesota, Ohio, Delaware, Michigan, Rhode Island, and Massachusetts. Reports of signal strength varied from very weak to very good with the primary interference coming from WWSW.

We are licensed for day-time only with a power of 4340 watts and pre-sunrise authorization of 434 watts. We have been operating from a new location with new transmitter and tower for two years now after many years of operation with a Westinghouse transmitter feeding a flat-topped virtical supported by two towers. Thanks very much for your response.

Respectfully,

Rudy Wolf

Ass't. Technical dir.
